Optyma Plus™ New Generation

Raise your **efficiency** to a higher level. Equipped for **silence** and **top performance**.

Range extension for a complete offer:

- 0.6 - 16.5 kW for MBP refrigeration
 - 0.7 - 9.6 kW for LBP refrigeration
- Complies with the new Energy Related Regulations for fan motors

50%

less installation time. A fast fit that lets you keep up the tempo.

www.danfoss.com

OPTYMA PLUS™

DANFOSS CONDENSING UNIT

A cooler combination Faster to install, simpler to set up, easier to service

When we asked installers how to improve the known and trusted Optyma Plus™, you told us to make it quicker to install and simpler to set up and service. We listened, and here's the result: The new generation Optyma Plus™ - it's another step forward in plug and play. It will not just save you valuable time and costs in installation, set up and service, it will also reduce your customers' energy bill.

The same robust quality with added technology and smarter design. That's a seriously cool combination.

Silent and top performance for customer confidence

With its long-life compressor, acoustic insulation, component design as well as intelligent fan speed reduction during low capacity operation, the Optyma Plus™ is so smooth and quiet that your customers will benefit from the best sound performance in the market.

The highly optimised Micro Channel Heat Exchanger and electronic controller also contribute to considerable energy savings, making the Optyma Plus up to 20% more economical than an equivalent product offering and that's a sales argument your customers will notice.

**Up to
25%**

lower sound level provides greater comfort in residential areas.

Experience up to 20% energy savings from day one!

In-field stacking cuts costs

With its unique load bearing design, it's possible to stack units in the field. This cuts installation time, and saves on carpentry and brackets to reduce cost.

Extend

your possibilities
with new models
for low and medium
temperatures.

Designed for ultimate efficiency

Compact cabinet speeds installation

New compact design makes it easier to maneuver when fitting in tight spaces, saving installation time.

More accessible to speed service

Easier and quicker accessibility to all components with new double door design saves time during servicing, maintenance and repair.

Intelligent technology speeds start up and reduces risk

Preset parameters make it easier to get it right from the start. Fewer mistakes reduce the risk of damage and save time and money on repairs.

Technical data

Designation

OP - MPUM034 ML P00 G

1	Application: M = MBP / L = LBP
2	Condensing unit family: P = Optyma Plus new generation
3	Refrigerant
4	U = R407A/F/R134a/R404A/R507/R22 H = R404A/R507 G =R134a
5	Condenser type: M= Standard with micro channel heat exchanger
6	Displacement in cm ³
7	Compressor platform
8	Version P00 Voltage code: G = 230V/1-phase compressor & fan E = 400V/3-phase compressor & 230V/1-phase fan

MLZ compressors may be blue or black depending on the manufacturing origin

Make your choice!

Range extension for a complete offer in low and medium temperatures

Change for the better

At Danfoss we strongly believe in innovation, but only when it directly benefits our customers. We offer smarter ways of helping you fulfil your daily challenge of producing higher quality solutions at ever more competitive costs. That's precisely why we updated the tried and tested Optyma Plus™ to bring you a new generation.

Contact your local Danfoss sales office and learn why your business can gain from working with one of the world's leading suppliers to the refrigeration and air-conditioning industry.

Danfoss can accept no responsibility for possible errors in catalogues, brochures and other printed materials. Danfoss reserves the right to alter its products without notice. This also applies to products already on order provided that such alterations can be made without subsequent changes being necessary in specifications already agreed.
